**S**BURNS M⊆DONNELL.

Maximizing Site Value & Evaluating Future Use for Retired Power Plant Sites

Jeffery L. Pope, PE - Program Manager, D&D Serv

May 21, 2025

**Agenda** 

Step 2

Identification

of

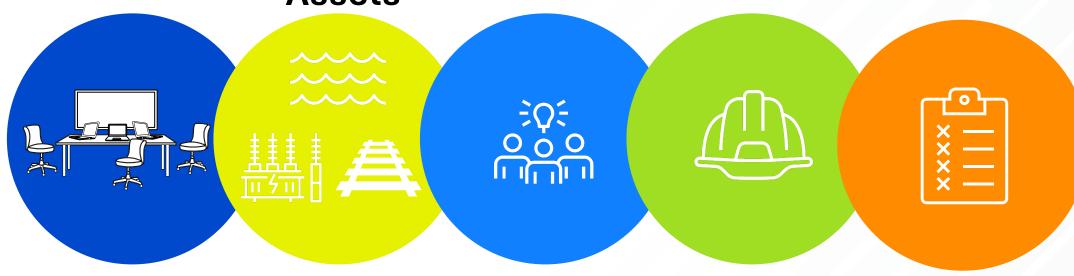

**Assets** 

Step 4

Site

**Preparation for** 

**Alternatives** 

Step 1
Plant
Retirement
Planning

Step 3

Reuse

**Alternatives** 

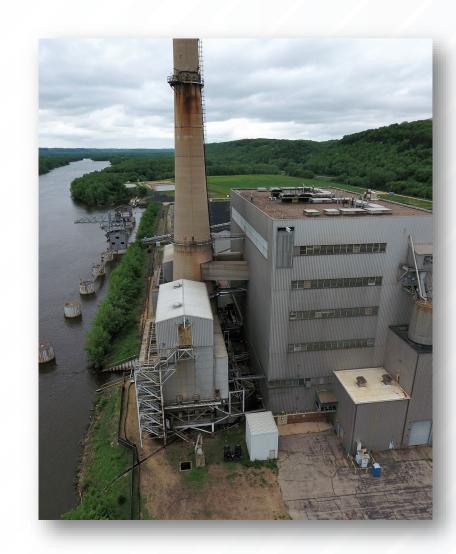

**Evaluation** 

**Summary** 

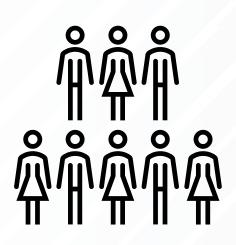

Step 1
Plant
Retirement
Planning

#### **Step 1 - Retirement Planning**

- Coordinate meeting (s) with stakeholders to consider future use
  - → Senior Management
  - → Engineering
  - → Environmental
  - → Security
  - → Real Estate
  - → Telecommunications
  - → Accounting
- Identify when plant will cease operation and when new reuse is anticipated

#### **Step 1 - Retirement Planning**

1

- Identify any future use constraints (environmental, regulatory requirements, etc.)
- Assemble List of Potential Future Uses
  - → New generation
    - Simple-cycle
    - Combined-cycle
    - ◆ RICE
    - Solar
  - → Battery Storage
  - → Synchronous Condenser
  - → Substation/Switchyard Expansion
  - → Industrial/Commercial
  - → Data Centers

#### **Step 1 - Retirement Planning**

#### **Determine Your Retirement Goals for Power Plant**

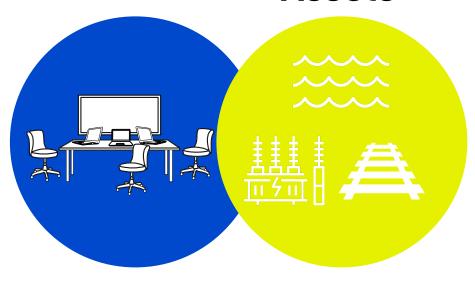

- Retirement-in-Place
  - → Building reuse by utility or for sale (no structural removal)
- Partial Demolition
  - → Removal of portions of plant for reuse for other purposes
- ▶ Full Demolition
  - → Whole property reuse

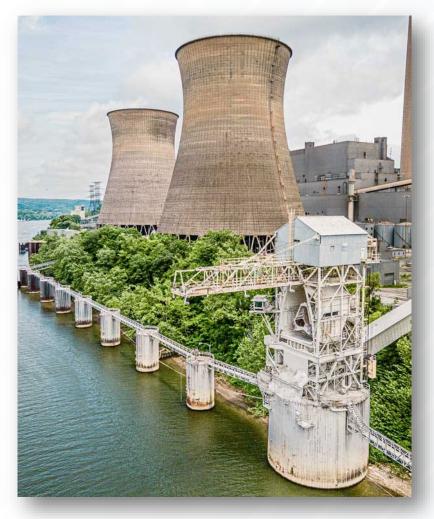

CONFIDENTIAL BOSINESS, FINANCIAL AND PROPRIETARY INFORMATION

### Step 2 Identification of Assets

Step 1
Plant
Retirement
Planning

## ONFIDENTIAL BUSINESS, FINANCIAL AND PROPRIETARY INFORMA

#### Step 2 - Asset Identification

#### **Property Assets**

- Waterway Access
  - → Barge loading/unloading
  - → Discharge structures

- Water Rights
  - → Intake structures for water
  - → Discharge structure and permits

# CONFIDENTIAL BUSINESS, FINANCIAL AND PROPRIETARY INFORM

#### Step 2 - Asset Identification

#### **Property Assets**

- ▶ Grid Interconnection
- Utilities
  - → Natural Gas
  - → Water
  - → Sewer
- Rail / Highway Access
- Commercial zoning

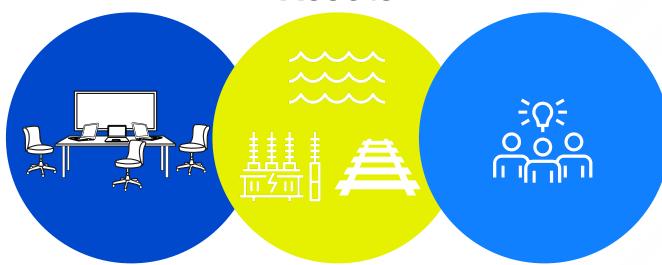

#### Step 2

Identification

of

**Assets** 

Step 1
Plant
Retirement
Planning

Step 3
Reuse
Alternatives
Evaluation

#### 1

#### **Step 3 – Alternatives Evaluation**

#### **Best Site Reuse Evaluation**

- Site setting (topography)
  - → Site ability to host new use
  - → Site regrading necessary to facilitate new use
  - → Location of adjacent water ways, wetlands, etc.
- Access to site (roads/rail/river)
  - → Local, state and Interstate highways
  - → Active spurs and mainline rail
  - → River access for barge loading/unloading

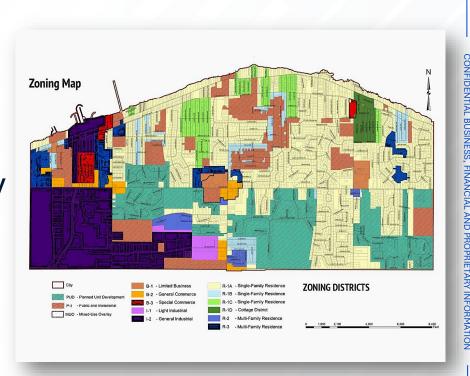

#### 1

#### **Step 3 – Alternatives Evaluation**

#### **Best Site Reuse Evaluation**

- Access to potential workforce
  - → Labor
  - → Contractors
- Need for property types based on community development plans
  - → Community redevelopment plans
  - → Other industries in the area that may need support
  - → Regional needs for new generation, battery storage
  - → Regional/Nationwide needs for Data Centers based on increased Al usage

#### 1

#### **Step 3 – Alternatives Evaluation**

#### **Best Site Reuse Evaluation**

- Available utilities to site
  - → Natural Gas (for new generation or industrial/commercial use)
  - → Water (potable/fire)
  - → Electricity
  - → Sewer (storm/sanitary)
- Neighboring properties
  - → Ability to expand or add to property
  - → Residential vs Industrial neighbors
  - → Noise and operational concerns with new use

#### **Step 3 – Alternatives Evaluation**

#### **Cost Estimate Development**

- Site Preparation
  - → Environmental Abatement
  - → Structures/Foundation Removals
  - → Existing utilities abandonment or removal
  - → New utilities installation
  - → Subsurface preparation
  - → Final site grading

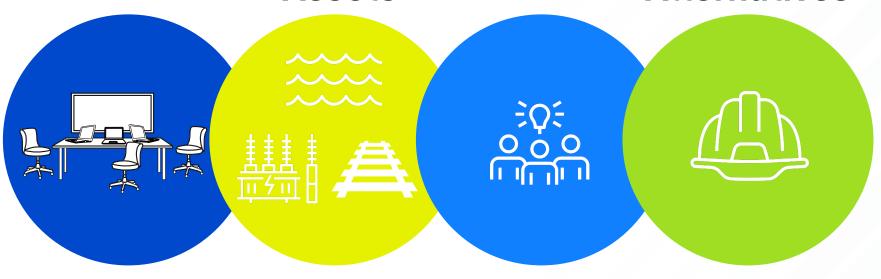

#### Generating Station Full Demolition Cost Estimate Summary

tem	Description		Task Cost
1	General Conditions		0001
1.1	Mobilization and De-Mobilization	\$	185.00
1.2	Erosion Controls	\$	61.00
	Mechanical System Isolation	\$	10,00
	Electrical System Isolation/Reconfiguration	S	129,00
1.5	IT & Telecommunications Isolation or Re-Routing	\$	60.00
	Energy Delivery System Isolation	\$	563,00
1.7	Full Removal of Intake & Discharge	\$	2,161,00
	Subtotal for General Conditions Costs	\$	3,169,00
2	Decommissioning and Cleaning	_	47.0
2.1	Drain Boiler, Condenser, Feedwater Heater, Boiler Feed Pumps	\$	17,00
2.3	Boiler, Precipitator & Ash System Cleaning Remove and Dispose all Debris, Trash & Combustibles	\$	210,00
2.4	Lubricating & Hydraulic System Draining	\$	96,00
2.4	Subtotal for Decommissioning & Cleaning Costs	S	430,00
	Subtotal for Decommissioning & Steaming Costs		430,01
3	Environmental Costs		
3.1	Asbestos Removal and Disposal	\$	1,795,00
3.2	PCB Building Materials Abatement	\$	562,0
3.3	Universal Waste Removal and Disposal	\$	150,0
3.4	Regulated Materials & Chemical Removal	\$	700,0
3.5	Transformer Oil Disposal	\$	47,0
3.6	PCB Impacted Concrete Removal	\$	29,0
	Subtotal for all Environmental Costs	5	3,283,0
4	Structure Demolition and Removal		4.000.0
4.1	Demolition of Units 1, 2, 3 Turbine Hall, Coal Handling, and Out Buildings	\$	4,830,0
4.2	Chimney Demolition	\$	445,0
4.3	Slab & Foundation Demolition	\$	250,0
4.4	Backfill from Borrow Source	\$	125,00
4.5	Asphalt Removal	\$	55,0
	Subtotal for Demolition and Removal	\$	5,705,0
5	Site Restoration		
5.1	Rail Road Track Removal	\$	946,00
5.2	Concrete Crushing	\$	390,00
5.3	Backfill & Compaction	S	410,0
	Fine Grading & Seeding	Ť	410,0
	Subtotal for Site Restoration	\$	1,746,0
	Subtotal Direct Costs	s	14,333,00
	Indirect Costs		
			1,863,00
	Engineering/Permitting/Construction Management	\$	
	Bonds/Insurance	\$	287,00
	Bonds/Insurance Contingency	\$ \$	287,0 2,867,0
	Bonds/Insurance	\$ \$	287,0 2,867,0
	Bonds/Insurance Contingency Total Direct and Indirect Costs	\$ \$	287,0 2,867,0
	Bonds/Insurance Contingency Total Direct and Indirect Costs  Scrap Salvage Quantity and Value	\$ \$	287,00 2,867,00 <b>19,350,0</b> 0
	Bonds/Insurance Contingency Total Direct and Indirect Costs  Scrap Salvage Quantity and Value Ferrous Metals Quantity (29,000 tons) Non-Ferrous Quantity (2,285,000 lbs)	\$	287,00 2,867,00 <b>19,350,00</b> (1,050,00
	Bonds/Insurance Contingency Total Direct and Indirect Costs  Scrap Salvage Quantity and Value	\$ \$	287,00 2,867,00 <b>19,350,00</b> (1,050,00 (1,740,00
	Bonds/Insurance Contingency Total Direct and Indirect Costs  Scrap Salvage Quantity and Value Ferrous Metals Quantity (29,000 tons) Non-Ferrous Quantity (2,265,000 lbs) Subtotal for all Scrap Salvage Value - SUM OF Item Nos 6.2 and 6.4	\$ \$ \$	287,01 2,867,01 <b>19,350,00</b> (1,050,01 (1,740,01 (2,790,01
	Bonds/Insurance Contingency Total Direct and Indirect Costs  Scrap Salvage Quantity and Value Ferrous Metals Quantity (29,000 tons) Non-Ferrous Quantity (2,285,000 lbs)	\$ \$ \$	287,01 2,867,01 <b>19,350,00</b> (1,050,01 (1,740,01 (2,790,01
	Bonds/Insurance Contingency Total Direct and Indirect Costs  Scrap Salvage Quantity and Value Ferrous Metals Quantity (29,000 tons) Non-Ferrous Quantity (2,265,000 lbs) Subtotal for all Scrap Salvage Value - SUM OF Item Nos 6.2 and 6.4  Tot Net Cost	\$ \$ \$ \$	287,00 2,867,00 19,350,00 (1,050,00 (1,740,00 (2,790,00

	Bonds/Insurance Contingency Total Direct and Indirect Costs  Scrap Salvage Quantity and Value Ferrous Metals Quantity (29,000 tons) Non-Ferrous Quantity (2,265,000 lbs) Subtotal for all Scrap Salvage Value - SUM OF Item Nos 6.2 and 6.4  Tot Net Cost	\$ \$ \$ \$	287,00 2,867,00 19,350,00 (1,050,00 (1,740,00 (2,790,00

CONFIDENTIAL BOSINESS, FINANCIAL AND FROFTNETART INFORMATION

Step 2
Identification
of
Assets

Step 4
Site
Preparation for
Alternatives

Step 1
Plant
Retirement
Planning

Step 3
Reuse
Alternatives
Evaluation

#### **Step 4 – Site Preparation**

1

- ▶ Grid disconnection
  - → Identify interconnections
  - → Drop interconnections to power down the plant
  - → Determine potential for temporary power during abatement/demolition
- Structure decommissioning
  - → Chemicals, oils, greases, other materials removal/disposal
  - → Asbestos abatement
  - → PCB-impacted material removal
- Structure removal
  - → Valuation evaluation for structures and equipment (resale vs scrap)
  - → Traditional demolition vs explosive demolition
  - → Scrap value (owner controlled vs demolition contractor controlled)

#### **Step 4 – Site Preparation**

- Foundation abandonment/removal
  - → Partial removal (just below grade)
  - → Partial removal to pile caps
  - → Full Removal
- Underground utilities abandonment/removal
  - → Abandonment of utilities in-place (cap ends for small diameter)
  - → Abandonment of utilities in-place (flowable fill for large diameter)
  - → Full removal and backfilling
- Final site restoration
  - → Excavation and engineered backfill for new construction
  - → Site grading (rough) preparing for new construction
  - → Site grading (fine) for immediate reuse

#### **Step 4 - Site Preparation**

#### Other Retirement Requirements – For Coal Plants

- ▶ Determine coal pile, landfill and pond closures
  - → Coal Pile: residual removal and capping/grading
  - → Landfill: close in place or remove
  - → Ash Pond: close in place or remove
- ► Legacy CCR Rule, 2024
- ▶ Onsite stormwater/process ponds

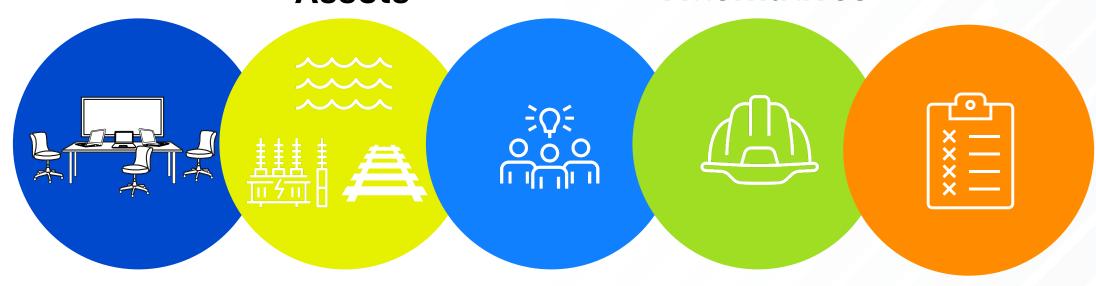

ONFIDENTIAL BUSINESS, FINANCIAL AND PROPRIETARY INFORMATIC

Step 2

Preparation for
Alternatives

Step 1
Plant
Retirement
Planning

**Step 3**Reuse
Alternatives
Evaluation

Summary

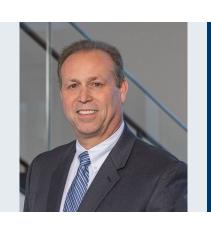

#### **Summary**

- Retirement planning should include potential reuse opportunities
- ▶ Identify the site assets
- Evaluate potential reuse alternatives
- Prepare the site to accommodate the chosen reuse option(s)
